Miteinander Zukunft schaffen

A TRADITION OF PRECISION SINCE 1919

Highly specialised in machining technology. A family-run business now in its 4th generation. Rooted in the Black Forest since its earliest days. Carl Leipold GmbH stands for precision work derived from a long tradition. From its beginnings as a small trade business, our company has developed to become a solutions provider for the manufacturing of precision parts. Founded in 1919, our heart has been beating in our headquarters in Wolfach in the Black Forest since 1927. And the continuity inherent in being a family-run business extends beyond our senior management team; our success is in large part thanks to employees from the local area – many of whom represent the 2nd or 3rd generation of their family to work for us. In 2019 Carl Leipold GmbH is celebrating its centenary.

STRONG PROCESSES FOR EXCELLENT DELIVERY PERFORMANCE

"Highly complex variety combined with high process stability and delivery reliability"

Variety in series

The watchword of Carl Leibold GmbH is high-precision series production. More than 1,000,000,000 turned parts leave our production plants every year. "Variety in series" is our motto. This means achieving the highest possible level of variety in combination with the lowest possible level of complexity. Our product portfolio contains around 5,000 items, which we supply to approximately 200 customers in four sectors: Connectivity, Mobility, Industrial Engineering and Aeronautical Engineering. Our export rate is 50%.

Process stability for quality and efficiency

Carl Leibold GmbH guarantees its customers a high level of delivery reliability. Across three plants, we manufacture our products using eight machine groups, with a total of 166 machines. Thanks to our extensive production capacity, we are able to efficiently keep pace with the dynamic demands of the market. Our production processes are robust and standardised and guarantee a consistently high level of quality. We manufacture exclusively in Germany and the USA. It is solely thanks to the qualified employees at our sites in Wolfach, Dransfeld and Windsor (Connecticut) that we achieve both high quality standards and a high level of efficiency. We have been training our own employees for 100 years, and have a stable apprenticeship quota of approximately 10%.
